NULOC 1

- 
- 

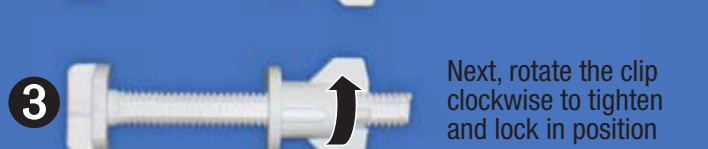

Fasten by compressing clip ends to open jaws and slid over retaining rings on stem.
- 

Position clip to desired length and release to lock in position

To remove compress clip ends to disengage jaws and slide off stem.

NULOC 2

- 
- 

Fasten by lining up clip with keyway and sliding onto the stem
- 

Next, rotate the clip clockwise to tighten and lock in position

To remove fastener rotate counterclockwise until it stops and slide off stem
